

Quickcomm

Quickcomm. The trusted TEM Solution.

By bringing HR, Finance, Telecom and IT groups together to operate cohesively on one dynamic platform, Quickcomm enables corporations to tag their telecom as a “Resource” rather than an “Expense.”

Making this happen should be the goal of your enterprise.

“By eliminating redundant inventory as a result of loading their inventory data into Quickcomm, an organisation can save up to 30% of its telecommunications expenses.”

– COMPUTER SCIENCES CORPORATION

“Quickcomm provides me with a total management system. Analysing bills and preparing reports used to take me days. Other parts of my job suffered. Now with Quickcomm, it’s so easy. Its paid for itself fifty times over.”

– SIEMENS

QUICKCOMM FEATURES

International Capabilities

Quickcomm is currently deployed on 5 continents. Currency conversion is standard and native language support is available. Quickcomm has offices in North America, Europe & Asia supporting our clients 24x6.

Inventory Validation

Quickcomm includes asset management and provisioning that links to the invoice validation process. Quickcomm directly relates inventory items to contracts for validation and cataloguing. Because of this, specific terms (i.e. moves, add, changes) can be immediately validated against billing.

Multiple Carrier Bill Processing

With over 200 different electronic translators for carrier bills worldwide, Quickcomm can process any and all invoice formats, consolidating all billing into a single system in a single or multiple carrier environments. Quickcomm also guarantees that it will build a new translator within 7 days and will update an existing one within 5 days.

Order Tracking

Quickcomm incorporates an order tracking management tool that reconciles orders placed against bills received for new services, cancellation of redundant services as well as moves/relocations and upgrades. Orders can be placed to carriers using the Quickcomm system

Contract Compliance

Quickcomm ensures that call charges, for every single call, comply with carriers' contract rates. And with a full catalogue of your contracted services, contract validation begins with the ordering process and is reinforced as bills are loaded. Usage patterns and optimisation opportunities are also core parts of the system.

Reporting on Demand

To gain the full benefit of the wealth of information contained within Quickcomm TEM, comprehensive reporting is included. The application includes a management tool enabling users to run reports regularly and highlight anomalies as they happen. The entire suite of Quickcomm reports is available on-demand and on-line 24x7.

ASP or Licence — You Choose

Quickcomm can be deployed onsite or as an ASP. The ASP deployment option makes it easy with a near-zero footprint on the desktop. With nothing more than a 30 second, one-time download of the security plug-in, users can access the entire solution from a standard web-browser.

LOW RISK, EXPERT DEPLOYMENT

Technology deployments are seldom easy. They start with gaining a full understanding of how things work today and how they can work better with Quickcomm. As the first and most trusted TEM software company, we feel it's our responsibility to set the service and performance standards for a market segment we helped create. So at Quickcomm, the only deployment promises you'll hear are the ones we're capable of keeping. That's how we earned our reputation for superior execution and that's how, deployment after deployment, we keep it.

The key foundation to our clients' success is our Professional Services Group. Quickcomm's team, with over 30 years of experience in the telecom industry and our own roster of over 50 clients in the Fortune 1000, provides technology expertise with an honest and mature approach. When you become a client of Quickcomm, you are immediately assigned an Account Manager. This professional's sole responsibility is to ensure that you are satisfied with your solution. This person will be your liaison to the rest of the company and will guide you through the process of learning and implementing your solution. Moreover, they will ensure that the other professionals working on your account are maintaining the high standards that we have set for ourselves.

To learn more about our solutions and services, visit us today at www.quickcomm.com.

Founded in Australia in 1997 by telecom industry veterans, Quickcomm is the largest and most trusted global provider of Telecom Expense Management (TEM) software solutions worldwide. “Global 2000” companies have been turning to Quickcomm for nearly a decade to seamlessly optimise telecom expenditures across the enterprise and improve the bottom line.

Quickcomm is committed to delivering against what our customers really need: business process change, global capabilities, proven technology, industry expertise and insight, and a proven ability to deliver.
